

**Review Pg. 17-18#(1 – 7)d Be sure to check answers at the back of the book**

**U1L3 – Simplifying Algebraic Expressions & Solving Equations**

Students will review simplifying algebraic expressions and solving equations.

Examples

1. Simplify  $2c + 3c + 4 =$

2. Simplify  $(2x^2 + 3) + (-4x^2 + 8)$   
=

3. Simplify  $2(2a + b) - 3(3a - 2b) =$

4. Solve

$$y + 6(y - 3) = 2(3y - 2)$$

5. Solve

$$\frac{3}{4}t - 2 = \frac{1}{2}(t + 2)$$

Ex. Pg. 22#(1 - 7)alt

Pg. 23 - 24#(1 - 6)alt, 7 - 8
