

Review Pg. 71#10

U2L5 – 1.6 Finding Points of Intersection Using Graphing Calculators

Smartboard??

Students will learn to use the graphing calculators to find the point of intersection of two lines.

We will do the examples on pgs. 74 – 75 together.

Note: Spreadsheets, The Geometers' Sketchpad and Zap-A-Graph are other pieces of software that can be used to solve linear systems as well (shown on pgs. 78, 80, 81 respectively).
